

BANKROLL JACKPOT

2 to 4 Players: Use a roll of 50 pennies (1¢), roll of 40 nickels (5¢) and roll of dimes (10¢) for the "bankroll." Divvy out (divide) the bank money equally to each player.

Decide who goes first. 1st player tosses two dice, add the total, and if they have an **exact number of coins** to put in a cup (the jackpot), they write down their point score in the boxes.

A player without **exact coins** for the jackpot loses turns, passes dice to next player and does not score points. Play ends when no possible tosses or coins remain. High scorer wins the jackpot.

Winner deposits earnings into the bank. Divvy out bankroll and repeat play.

Set a goal: It can be the first player to win three jackpots is the champion.

Optional "Folds" Play: Divvy out three quarters (25¢) to players to buy "folds." Folds let player to skip a low dice toss. To fold, put a quarter in the jackpot and score no points.
